

Code No: R07A12102

R07

Set No. 2

**I B.Tech Examinations, December 2010
FUNDAMENTALS OF BIOLOGY
Bio-Technology**

Time: 3 hours

Max Marks: 80

**Answer any FIVE Questions
All Questions carry equal marks**

1. Write an account on Pond ecosystem. [16]
2. Name three substances that are used by certain bacteria as terminal electron acceptors in the process of anaerobic respiration. How does this process differ from aerobic respiration? What is the biological importance of anaerobic respiration? [16]
3. A healthy working pancreas in the human body is important for maintaining good health by preventing malnutrition, and maintaining normal levels of blood sugar? [16]
4. What are permanent tissues? Explain with suitable diagram. [16]
5. Make a list of similarities between bacteria and blue green algae. [16]
6. Write notes on:
 - (a) Genetic engineering for microbial enzyme production
 - (b) Applications of microbial enzymes in diagnostic analysis. [8+8]
7. Describe the mechanism of transcription. [16]
8. What is a synapse? How are they differentiated? Discuss in detailed about synaptic transmission. [16]
